Silver Chocolate Pots of Colonial Boston¹

Gerald W. R. Ward

Introduction

Tea, coffee, and chocolate—three drinks we now take for granted—were all introduced to England and North America in the 17th century. Initially considered exotic beverages, each arrived to the Anglo-American world from a remote part of the globe. Tea came from the Orient, coffee from North Africa and the Middle East. Chocolate was the gift of Mexico, Central America, and South America; it first arrived in Spain in the 16th century and then migrated to France, England, and the rest of Europe, before making the trip to North America and to our area of concern here, New England, through the West Indies trade. Flavorful, rich, and nutritious, chocolate was indeed a boon to the 17th and 18th century diet. Usually consumed as a beverage in those days, chocolate was “of a dusky colour, soft, and oily; usually drank hot, and esteemed not only an excellent food, as being very nourishing, but also a good medicine; at least a diet, for keeping up the warmth of the stomach, and assisting digestion.” Wealthy consumers and silversmiths responded to this expensive novelty in the Anglo-American world by demanding and creating a specialized form—the chocolate pot—to be used for serving this luxurious new drink [1–7].
